EDUCATION

- 2025-2027
IGNOU
 - Bachelors in computer application
- 2023-2024
DHURVA PUBLIC SCHOOL
 - Science
 - 79%

SKILLS

- HTML5,CSS , Javascript
- Tailwind CSS , Bootstrap
- React.js
- Next.js
- Node.js, Express
- Git, GitHub
- Critical Thinking

LANGUAGES

- English (Fluent)
- Hindi (Fluent)

PROFILE

I am a motivated and detail-oriented fresher web developer with strong fundamentals in HTML, CSS, JavaScript, and React. I have built several hands-on projects, including responsive websites and real-world applications, which helped me understand both frontend development and basic backend integration.

I enjoy solving problems, writing clean code, and continuously improving my technical skills. I am currently looking for an entry-level or internship opportunity where I can contribute to real projects, learn from experienced developers, and grow as a professional web developer.

PROJECTS

- MindPulse

DEC-25 TO FEB -26

Beyond Words - Seeing the Truth

 - Behavioral Engine: Built a "Digital Body Language" system to track typing patterns and hesitation. Detects emotional distress and "honesty gaps" missed by standard text-based AI.
 - Privacy & Security: Implemented client-side AES-256 encryption and a secret key system for 100% anonymity. Prevents raw user data from being stored on external servers.
 - Performance Stack: Integrated Groq LPU for <200ms latency and Pinecone for tracking behavioral "Vibe" patterns. Enables real-time therapeutic interactions and mental state analysis
- Natours-ai

Oct-25 to Jan-26

Ai-powered Auto-tour planner system

 - AI Auto-Planner: Built a travel architect using Gemini 2.5 Flash to generate custom itineraries and budget breakdowns based on user interests.
 - Immersive Audio: Integrated Real-time Voice Synthesis with karaoke-style text highlighting for synchronized cultural audio guides.
 - Cinematic Tech Stack: Developed a full-stack Next.js 14 app featuring GSAP parallax animations and secure JWT/Bcrypt authentication.
- The Oggy Project

2024 - 2025

Interactive Frontend Laboratory

 - Logic-Driven Design: Developed a complex, interactive ecosystem using only Advanced CSS3 and Semantic HTML5 to prove that high-level UI/UX can exist without JavaScript dependencie
 - Visual Engineering: Implemented CSS Grid, Flexbox, and custom Animations to build interactive game sections, styled music layouts, and responsive episode cards.
